Student Voice in Learning

Step 1 - Research

Explore strategies and practices you can put in place to elevate student voice, while also ensuring that students get the guidance they need to graduate fully prepared. How might those strategies support effective remote or hybrid learning?

Delve into how you can intentionally build students' capacity to guide their own learning.

Step 2 - Reflect

Share your findings with your team and discuss these questions:

- What strategies and practices would work best for your school? Which would most effectively support your school mission and your goals for teaching and learning?
- Did differences of opinion surface within your team? In particular, did differences emerge between the views of students and adults?
- How can we test our ideas with students, teachers, and others?
